Editor's Notes

Four months into this pandemic there's still nothing going on. Although the State of California is slowly lifting the lockdown, unfortunately the weeks after Memorial Day weekend has seen a rise in CCP virus cases... not just California, but in a lot of other states. Yes, I do call Covid the "CCP virus" because the Chinese Communist Party continually shifts the blame of its origin elsewhere and not owning up to it. Ok... enough of this.

Because of the ongoing pandemic, most summer conventions have been cancelled, postponed, gone virtual or a hybrid. Basically nothing's been going on since the last issue. But that's fine. I completely understand that everyone's safety comes first before any large gatherings. Before this publication goes live, I have been constantly checking convention websites for updates on their statuses. From what I've seen so far, a few the of summer conventions have been postponed to either October or November. The situation will be different to each part of North America and the rest of the world. While some conventions are still on schedule, their status could abruptly change. Again, let the summer convention schedule in this issue be your guide to check the status of each convention.

Watching YU-NO is like researching a piece of anime history disguised as a piece of entertainment media. It's something that really would have been far more impactful had it aired 20 years ago than it is today, but nevertheless it's interesting to watch for educational purposes perhaps more so than the story itself.

In essence, *YU-NO* is based on a classic visual novel from all the way back in 1996. At the time of its release, there wasn't really anything else like it on the market. Visual novels [VN] back then were still relatively unambitious and it wasn't really a medium attempting any grand storylines until *YU-NO* came along. I guess you can say that *YU-NO* was for the visual novel medium what something like *Evangelion* was to anime for its time. Something that paved the way for so many other works in the decades thereafter. But in the same way that *Evangelion* is not normally considered anything revolutionary for people that watch it for the first time today, the same problem can be seen here as watching the anime adaptation of *YU-NO* 23 years after its original VN release will make it a lot more difficult seeing what the big deal is supposed to be.

It is however quite clear that a lot of famous

anime have taken ideas and inspiration from *YU-NO* originally. *Steins;Gate* might be the most obvious parallel there seeing as its time leap machine is clearly based on *YU-NO*'s reflection device, and its world line and attractor field concepts are pretty much directly taken from it as well. You can kind of think of *YU-NO* as the grandfather of all sci-fi and time travel-oriented visual novel stories, which has surely also spilled over into other mediums in Japan over the years considering that the game has always been amongst the top rated VNs in the country because of its legacy.

That said, the actual anime itself isn't really that special by today's standards. It goes through the various routes one at a time in a way which is not particularly unusual for VN adaptations but it comes with the regular problem of whichever heroine who's route it's not currently on seemingly

disappearing from the story all of a sudden which feels quite unnatural. The characters themselves are also fairly bland, and you're often left with the feeling that a bunch of content has probably been cut out from the original since the pacing can be quite jumpy. As a result it can sometimes get confusing and it's a bit difficult to really settle down with it. Eventually things does start to make more sense about what is going on in the grander scheme of things but it takes quite a long time to get there, and once it gets to the final arc things will have changed so much it feels like you're watching a completely different anime than you did at the beginning. A better anime admittedly, but nevertheless the continuity of it all feels a bit strange as a result. On the other hand, the plot reveals towards the end are quite shocking in a lot of ways, and I mean that in a positive sense. It somehow managed to tie all the loose plot threads together in a much more complex manner of fashion than one would anticipate.

Overall though it's a bit difficult knowing whether to recommend *YU-NO* or not because the main reasons for watching it are not really

related to the anime itself but rather just because of the source material's legacy and impact on the industry in the past two decades. It's something more worth watching to satisfy your curiosity and to learn something in the process rather than for what entertainment value it possesses by itself.

But as a side note I can in that case also mention that the 1080p remake of the visual novel is being officially released on PC in Japan and on multiple platforms in English on October 1st, 2019. In other words, literally the same day as this anime ended. I'm pretty sure that's not a coincidence so we can definitely assume the main purpose of this adaptation was to boost sales and interests of the VN's remake, and I think I might as well just go ahead and oblige to that because if you haven't seen *YU-NO* yet and you've been thinking of whether you should do it or not... your best bet is most likely to just go ahead and pick up the just released VN remake instead. I'm probably going to do the same one of these days. ❖ HaXXspelten

Graduation and its Adult Distinctions

Anime is already inundated by show after show of high school settings. It can get tiring after a while. I, therefore, couldn't help but be intrigued by a 27 year old male protagonist looking for full-time work. Expectations were betrayed somewhat when, one contract and one pill later, he got enrolled for high school looking ten years younger. I enjoyed it though. The show has its combination of high school shenanigans and old man jokes. I graduated from university recently and my back sometimes hurts.

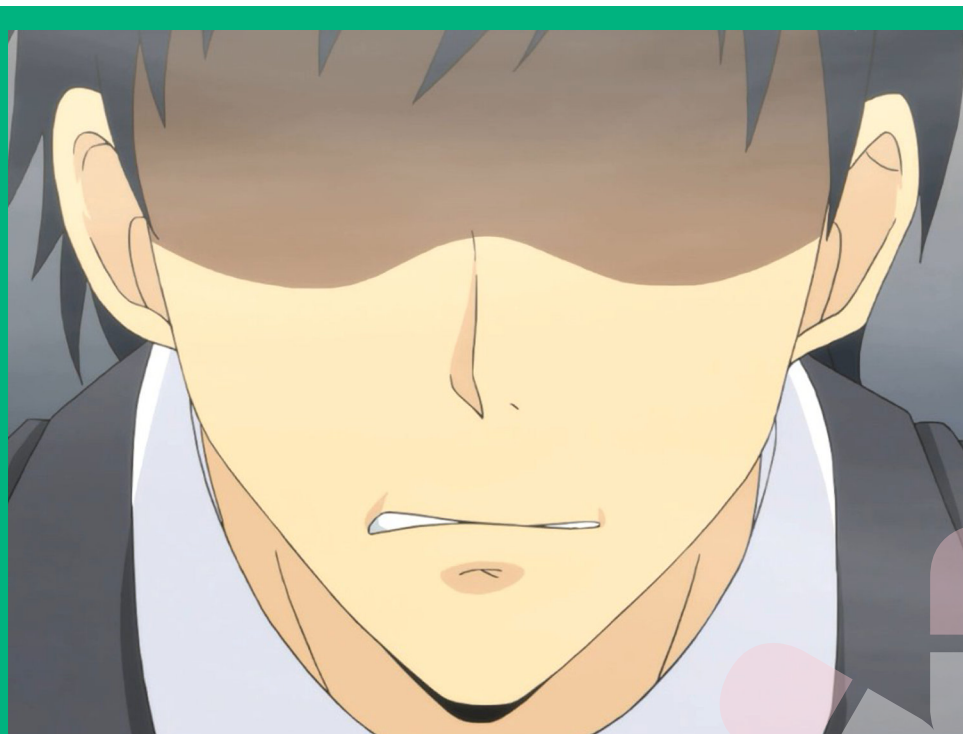

As a fellow recent graduate, I found the male protagonist's career troubles in *ReLIFE* relatable. I've felt the pressure of finding and working a job that's financially sustainable and spiritually rewarding. The job I had until recently satisfied neither of those qualities. It was long hours of grunt labor from a demanding boss for menial pay and the expectation that I'll eventually work my way up. And in the brief time that I've been employed in this line of work, politics specifically, there's no shortage of people from the other factional camps undermining each other, suspecting each other, gossiping about each other, saying mean things towards each other.

It's the kind of pettiness and nastiness that you expect that people, having graduated from school and/or aged enough, would have grown up and out from. Depressingly, exhaustingly, and perhaps even maddeningly, that's not necessarily the case in either political America and corporate Japan. Kaizaki learns that lesson very harshly. To shake him out of his funk and find steady employment, he re-lives

his high school life one more time for some healing... except that, as it turns out, high school life can also get pretty petty and nasty. And so, from a less than original premise, we get a somewhat novel perspective: high school life from a struggling salaryman.

The *ReLIFE* program's mission is to help young adults, whether they be part-timers or NEETs, find the confidence to find and retain full-time work. NEET stands for "Not in Education, Employment, or Training." To lay out some cultural context, as Japanese society gets older, more productive young people are needed than ever to help support the country's welfare system, to say nothing about its economic growth. However, in recent decades, the standard of full-time, lifetime employment for male professionals has eroded, as globalization has led to both the government deregulating labor standards and corporations downgrading worker positions in order for country and companies to stay competitive with increasingly globally interconnected markets. More insecure part-time and contract work took

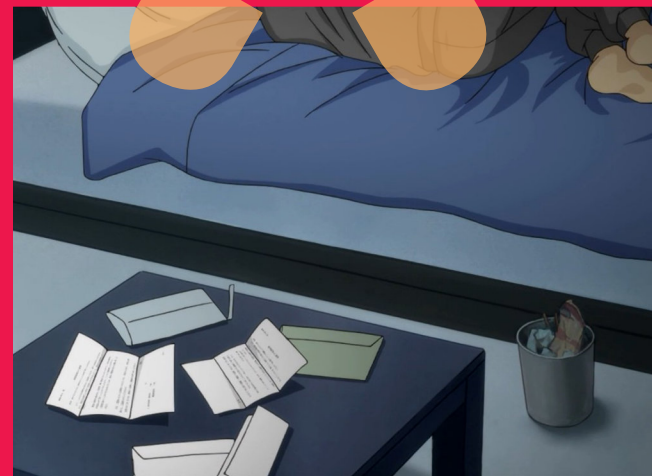

the place of full-time work, and more people than ever before became NEETs.

In response to tighter budgets due to shrinking income and shorter hours, and grander ambitions as a result of many women receiving university-grade educations, women have entered the workforce en masse. However, the institutional sexism of Japanese society, if not completely prevents, discourages, and often discourages actively, women from climbing up their career ladders. Even today, the vast majority of women in the work force in Japanese society are part-timers. Those women who choose to work in corporate career tracks tend to face unfriendly and even hostile work cultures. These toxic atmospheres fester on due to ambitious, jealous, entitled, and sexist male colleagues who believe that a woman's place in society is a full-time wife, mother, and homemaker. And yet if they want to keep their jobs, let alone get promoted from them, women have to endure.

Advancement in corporate career tracks, in a

nutshell, require of corporate employees both long hours and complete loyalty to the companies that hire them. In addition to being tired, they may be demanded to accept, put up with, and even commit or become complicit in promoting unethical corporate actions, environments, and philosophies. Enter Kaizaki, a former career track worker. He became so upset by how malicious his company's culture seemingly led his female mentor to commit suicide, by how callously animated his mentor's coworkers were in discussing should replace her as the company's top employee, by how shamelessly calculating the company head acted in using her death as an excuse for the rest of his employees to work more diligently, that Kaizaki made the drastic and dramatic gesture of seemingly forcing his head to accept his resignation.

The head's response was shameless, cruel, and went something like this: "Kaizaki... Only upper-level management get to resign. Scrubs like you 'give notice.' You went to grad school, and you don't

know that? We won't even notice you're gone."

Kaizaki hadn't been working long in that company before he resigned/was fired. Even without his former boss poisoning the employment chalice, companies offering full-time employment would hardly chance upon taking on a worker with an apparently unreliable and untrustworthy record. Individual feel-good gestures of "standing up for what's right" means little and does little to change a system as structurally exploitative as the Japanese corporation. You also can't eat your principles, let alone use them to pay for the roof over your head. Grunts are left with no leverage and little power.

Traumatized by his mentor's apparent suicide, scarred by his former boss's taunting, he gradually glued back the shattered pieces of his smashed ego. He tried desperately and incessantly to get another full-time job. Alas, his efforts were to no avail. He gradually lost interest in continuing the job hunt. And then fatefully, he was approached with an offer. Become a high school student and go to

high school for a year. If he obtained his confidence back through it, the ReLIFE program would guarantee him a referral for some full-time position.

And here, the same petty and nasty things he experienced at his workplace manifested in his school life, via a deceptively more innocent and less harmless veneer. Attitudes and habits adopted during the most formative years of a person's life carry over and inform that person's future thoughts and feelings. The wrong attitudes and habits may lead people to becoming NEETs. They may contribute to people becoming suicidal. They may even encourage people to say and do otherwise nasty and petty things to each other out of ambition, jealousy, entitlement, or prejudice.

High school life provides people a protective social bubble, and high school students making mistakes make softer landings. However, making mistakes as a adult in the working world carries more serious consequences. For instance, a stolen school bag with your homework one day can be a

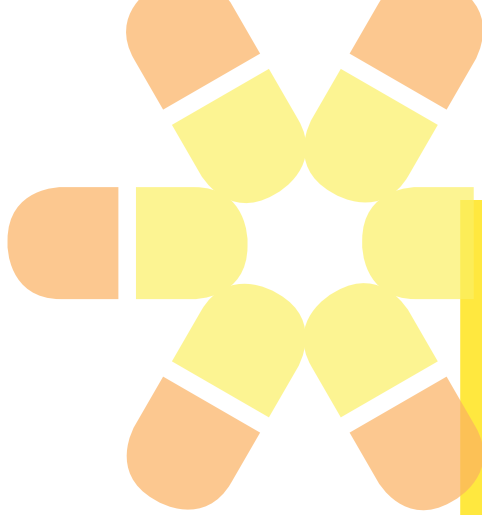

stolen purse with all your personal information and assets. The surprise and betrayal at people doing petty and nasty things is one thing. It is another entirely when you're expected to fend for yourself. You have no homeroom teacher to turn to for support. You may, in fact, have to endure that harassment if you want to keep your job... if you want the money to feed, clothe and shelter yourself. Losing that job can be life or death situation, even disregarding the mental and emotional toll all that constant bullying can do to a person. Society looks down on fully grown individuals relying excessively on their parents' financial teats to get by.

I can't help but empathize. I was bullied in elementary school, so I know what relentless harassment can do to a person's self-esteem. I am also deeply anxious about my current job security. The job that I have right now is part-time without benefits, with clauses stipulating that I could be let go at any time. I've had to hear dispiriting things about other people, and, more than once, I've had

to turn my eye away from things that made my conscience prickle uncomfortably. My boss isn't an easy person to relax to in general. However, I doubt I could relax enough in his presence given how much leverage, how much power he has over my future. In fact, without the help of colleagues supporting me and helping me negotiate a better working arrangement, I was dead set on quitting. And yet, I agonized over the thought of depending excessively on my parents. I was brought up on their words of perseverance and self-reliance, yet at the same time, I wanted to lock myself in my room.

So it may be a brave and foolish thing to do the right thing, but what decision do you think would cause more stress? *ReLIFE* doesn't offer any revolutionary solutions to the problems of corporate Japanese culture. While making his annual trip to visit his mentor's grave to pay respects, current employees from Kaizaki's former workplace expressed their admiration for his decision to quit. While inspired by his example, at the same time, they

confessed that they were afraid to follow their hearts. His abominable asshole of a boss still trumpets his dead mentor's name while slandering his name for productivity and profit. Who, in fact, is really at fault for the so-called NEET epidemic, society or the individual? And if fault should be attributed more to the former, is there anything that can be really done about it that doesn't mean people starving and shivering?

Does "growing up" mean that the respectable tasks NEETs are constantly scolded to do mean that they have to put up with this shit meekly? Or should they demand that the adult world be redefined?

If there is any answer *ReLIFE* provides to the problems of grown ups, of adults, from a failed salaryman to a high school student, it is one that is cultural. If, during the most formative period of their lives, Japan's next generation learn to get along with each other, become friends with each other, become... empathetic towards others, compassionate even... perhaps they won't just become productive citizens.

They may also become the country's future leaders and thinkers. ♡ ZeroReq011

When it comes to ecchi anime, *Ishuzoku Reviewers* takes this genre to a whole new level. While stereo-typical ecchi anime fan service is usually depicted by a shower scene, someone walking into a bedroom while someone is changing, clothes being blasted off by some explosion, etc., this show just slaps this in your face... unapologetically.

The premise of *Ishuzoku Reviewers* is reporting on the sexual experiences with other demi-human species and vice versa. Their main adventurers, based at the bar Ale & Eats, are Stunk (human), Zel (elf) and Crimvael (angel) with other characters joining in different episodes. Their goal is to visit the different human and mostly demi-human brothels in town and surrounding communities to experience the other species and their exclusive fetishes. During the course of the show, we learn that each of the characters have

favorites, learn difficulties with having sex with other species and the struggles they go through in their crazy adventures. We also learn that each of the demi-humans have different outlooks and morals in regards to sexual acts or experiences within their own and with other species. Upon completion, each of them report and rate their experiences.

Overall, this show doesn't have an overall main storyline, but each episode is more or less a self-contained, comedic story of their sexual escapades in different brothels. I guess you could say the the main storyline is about their overall sexual escapades locally and in foreign lands. Some topics that this show discusses in relation to modern-day society are sex, body size, gender roles, age and fetishes that most other anime rarely touch upon. I find it refreshing that *Ishuzoku Reviewers* presents any one of these topics in each episode in an open manner. This was a main possible reason why when this show first aired during the winter season, it was pulled at the time.

Ishuzoku Reviewers became one of the most controversial anime show to be aired in recent memory. The first time I heard about this show being pulled from the “air waves” was back in early February. Articles began appearing on various fandom news outlets that Funimation, the anime company that acquired the rights to air this show in North America, pulled it off their streaming service without prior warning to its subscribers. The show was also pulled from Amazon Prime Video. Before being pulled, the first three censored episodes and one dubbed episode were shown. It soon became apparent that it was pulled due to the nature of sexual content of the show. Later, Funimation gave a reason why it was pulled that it, to paraphrase, “fell outside of their standards,” which was laughable.

When Funimation acquired the license for *Ishuzoku Reviews*, they should have known the content of the material beforehand. They also should have known about its content during the translation and scriptwriting stage before the English dubbing sessions. It appeared to me that this was grossly and neglectably overlooked. But instead, Funimation received mixed backlash for removing the show from their streaming service as wells as having it aired in the first place. In addition, about week after Funimation pulled it, independent Japanese broadcaster Tokyo Metropolitan Television

(Tokyo MX) also pulled it. Other Japanese television stations still continued the broadcast.

In conclusion, *Ishuzoku Reviewers* is like a mixed bag that took ecchi anime to the extreme end of the genre... bordering hentai. Although I haven't read the manga version, which I plan to, I hope this anime version follows the manga. Visuals for the anime are very colorful and bright. The opening theme “Ikōze Paradise (Let's Go Paradise)” has a very disco beat to it while the ending theme “Hanabira Hondō (Flower Petal Ondō)” is reminiscent of traditional enka music... but speeds up at the end of the song.

This show is not meant for everyone. Although a comedy show at heart that explores sexuality, its humor can be harsh and vulgar, its sexual jokes range from tame to outright explicit. It takes an open-minded person to look past all this sexual innuendo and be entertained by its humor to find *Ishuzoku Reviewers* enjoyable. On the other hand, if you find legal prostitution, explicit sexuality, vulgar language, etc. objectionable, then this show is not for you. Now that I've given the basic premise to *Ishuzoku Reviewers*, you be the judge. If you enjoy this show... great. If not, discontinue watching. No harm, no foul. ❖ **Ed Gomez**
